1. Introduction:

The Game Suite is an extensive collection of classic games implemented in C programming language. It now includes the following games:

Mountain Ascend
Number Guesser
Ping Pong
Rock Paper Scissors
Snake Game
Tic Tac Toe
Hangman
Maze Game
Mine Sweeper

2. Features:

2.1 Mountain Ascend:

Player-friendly interface with clear game instructions.
Randomly generated octagon dice for climbing steps.
Slip streams that can cause the player to descend.
Winning condition upon reaching the 100th step.
Option to play again after the game ends.

2.2 Number Guesser:

Clear game instructions and rules presented to the player.
Randomly generated secret number for each game session.
Limited attempts for the player to guess the correct number.
Dynamic feedback based on the player's guesses (higher/lower).
Option to play again after the game ends.

2.3 Ping Pong:

Classic ping pong gameplay with a paddle controlled by the player.

Computer opponent with basic AI.
Simple scoring mechanism.
Real-time display of the game in the console window.
Option to play again after the game ends.

2.4 Rock Paper Scissors:

Clear game instructions for the player.
Randomized computer moves for variety.
Dynamic feedback based on the outcome of each round.
Option to check the game log for a complete score.
Option to play again after the game ends.

```
Enter your choice (1 for Rock, 2 for Paper, 3 for Scissors): 3
It's a draw!
Do you want to check the file for complete score? (yes/no): no
Enter your choice (1 for Rock, 2 for Paper, 3 for Scissors): 2
Computer wins this round!
Do you want to check the file for complete score? (yes/no): yes
Turn number: 1
User choice: Scissors
Computer choice: Scissors
Result: It's a draw!
Turn number: 2
User choice: Paper
Computer choice: Scissors
Result: Computer wins this round!
Enter your choice (1 for Rock, 2 for Paper, 3 for Scissors):
```

2.5 Snake Game:

Classic snake game with simple controls.
Dynamic display of the snake, food, and game board.
Game-over conditions (collision with walls or itself).
Option to play again after the game ends.

```
    COORD coord;

    coord.X = x;

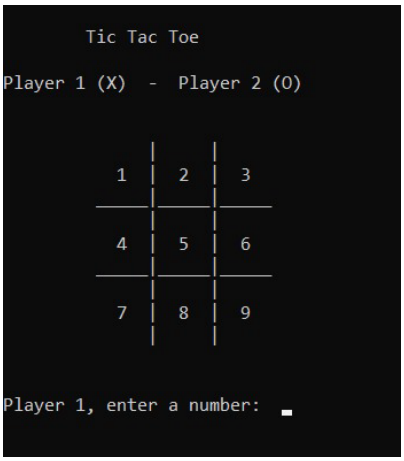
    coord.Y = y;

    SetConsoleCursorPosition(GetStdHandle(STD_OUTPUT_HANDLE), coord);

}
void gotoxy1(int x, int y)
{
    HANDLE a;
    COORD b;
    fflush(stdout);
    b.X = x;
    b.Y = y;
    a = GetStdHandle(STD_OUTPUT_HANDLE);
    SetConsoleCursorPosition(a,b);
}
```

2.6 Tic Tac Toe:

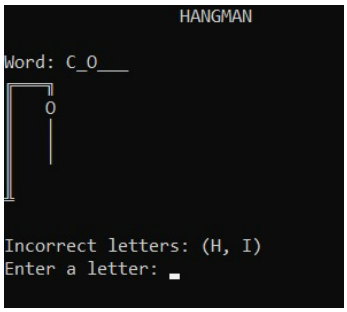
Classic tic-tac-toe gameplay for two players.
Real-time display of the game board.
Win/draw conditions based on the state of the board.
Option to play again after the game ends.



2.7 Hangman:

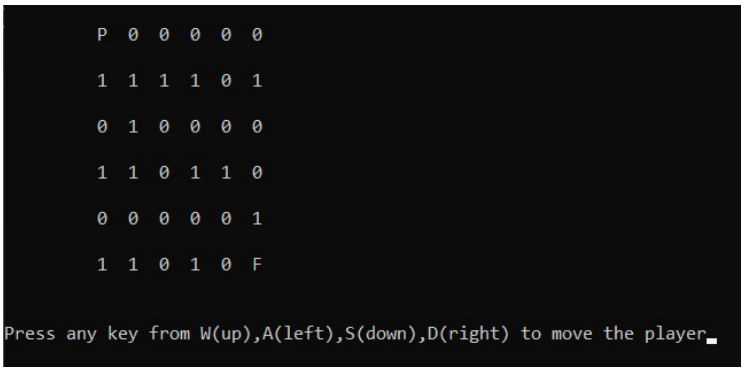
Interactive hangman game with a randomly selected word.
Visual representation of the hangman's gallows.

Dynamic display of correct and incorrect guesses.
Option to play again after the game ends.



2.8 Maze Game:

Maze navigation game with a start and end point.
Player-controlled movement using W, A, S, D keys.
Randomly generated maze with obstacles.
Winning condition upon reaching the end point.
Option to play again after the game ends.



2.9 Mine Sweeper:

Mine sweeping game with a 6x6 grid.
User input for selecting coordinates to reveal.
Display of the minefield and number of adjacent bombs.
Game-over condition upon hitting a bomb.
Option to play again after the game ends.

3. Output Screens:

Each game provides real-time output in the console window.

Clear and informative messages for game instructions, feedback, and results.
Consistent formatting for a user-friendly experience.

4. Conclusion:

The Game Suite offers a diverse and engaging experience with a wide range of classic games. Whether players enjoy strategy, luck, or skill-based games, the suite has something for everyone. The inclusion of hangman, maze game, and mine sweeper adds more variety to the gaming experience.

```
    case 5: // number guesser
    system("cls");
    num();
    break;
    case 6: // snake
    system("cls");
    snake();
    case 7: // minesweeper
    system("cls");
    mine();
    break;
    case 8: // rock paper scissors
    system("cls");
    rockpaper();
    break;
```

5. Future Enhancements:

Implement additional games to further expand the suite.

Enhance graphics and user interface for a more visually appealing experience.
Implement multiplayer functionalities for select games.
Incorporate sound effects and music to enhance the gaming atmosphere.

6. Acknowledgments:
The development of this Game Suite was made possible through the collaborative effort and dedication of the development team.

7. About the Developers:

The Game Suite was developed by Muhammad Fasih (23k-0017) AND Khawaja Hassaan Tariq (23k-0633).
